Dear Students/Parents:

The Off Campus Programming office has moved!

We have relocated from the student services area and are now located upstairs in Room 201. Here you can access the following services:

- Register with our Off-Campus Coordinator, Mr. Tschritter, in any of the following programs: **RAP, Work Experience,** and **Green Certificate**. All 3 programs provide students the opportunities to earn credits towards your high school diploma while also offering a unique chance to learn outside the classroom, build your resume, and jumpstart your career while still in high school.
- If you require any assistance in finding an apprenticeship, Mr. Lepps our Careers Next Gen Coordinator is here to help guide you.
- A job board is located right outside of Room 201 as well. We will post job information for positions that come through our office contacts there. Be sure to check the board regularly!

Here's how they work:

Registered Apprentice Program (RAP): This program allows you to start your apprenticeship training while you're still in high school. You'll work alongside experienced tradespeople, earn a wage, and gain valuable skills in your chosen trade. **To be eligible for RAP credits you must be registered for your blue book as an apprentice with AIT**. While in a RAP placement **you can earn up to 40 credits towards your high school diploma** while working on the first level of your journeyperson certificate.

Work Experience Program (WEX): Gain practical skills and explore potential career paths by participating in work placements with local businesses. Whether you're interested in trades, technology, healthcare, or any other field, the Work Experience Program offers valuable hands-on learning opportunities tailored to your interests. While in a Work Experience placement **you can earn up to 30 credits towards your high school diploma.**

Green Certificate Programs (GC): These programs provide specialized training in agriculture and agri-food industries. Through a combination of classroom instruction and practical experience on farms and ranches, you'll develop skills in areas such as animal science, crop production, and agribusiness management. While in a Green Certificate placement **you can earn up to 16 credits towards your high school diploma.**

If you are interested in any of the programs above, please see Mr. Tschritter and Mr. Lepps in Room 201 in the mornings, or contact by email at john.tschritter@gshare.blackgold.ca. You can also set up an appointment with Mrs. Tomkins at the front desk in Student Services.
