Dual Credit General Information

As part of our commitment to *Inspire Success* in our students, Black Gold School Division (BGSD) offers a program which provides a dual credit opportunity to BGSD high school students. Through this program, students will earn college/university credits from a post-secondary institution *and* high school credits from their school by completing college-level coursework. This program is in partnership with Black Gold School Division, Athabasca University, Lakeland College, Lethbridge College, Olds College, Portage College, Northern Lakes College, Northwestern Polytechnic, Southern Alberta Institute of Technology (SAIT) and Alberta Education.

Click here for a short video explaining more about Dual Credit! <https://bit.ly/3Cw5oBp>

Dual Credit Benefits

Dual credit helps students to:

- earn credits in high school *and post-secondary institutions* **at the same time**, as well as earn credits that may lead to preferred placement and workplace certification.
- get a jump start on their post-secondary education while still in high school.
- potentially complete post-secondary with less financial debt. Through the Dual Credit Framework, high school students do not pay post-secondary tuition fees (only the cost of textbooks/supplies).
- gain confidence to succeed academically in a post-secondary environment.
- use the latest educational technologies which prepare them for the technological workforce.
- learn what college and university instructors expect, while still in familiar high school surroundings.

Costs

Black Gold School Division will pay all post-secondary school tuition fees for students enrolled in dual credit courses. Students will be responsible for purchasing all textbooks and required materials. These costs are indicated in the course descriptions. Information about purchasing the required materials will be provided to students once they have been accepted into the course.

Dual Credit Application Steps

Determine if Dual Credit is for You: Conversations between student, parent and High School Dual Credit contacts are an important first step in the success of a student in the dual credit program. Have a conversation with your school dual credit supervisor (may be the principal, counselor etc) about the course you are interested in.

Prior to registering, please make sure you:

- Have the **prerequisites** for the course.
- Have a **block of time** in your schedule dedicated to the course.
- Are **committed to completing the course**. Limited numbers of students can participate and the course requires a major commitment on behalf of the student, the parent, the high school and the Post-Secondary Institute.
- Understand it is **your responsibility to purchase any textbook & materials required** for the course - these can be purchased through the online college Bookstores, Amazon.ca or other online stores. Costs are listed in the course descriptions and purchase information will be provided to successful applicants. Black Gold School Division pays all tuition costs.

For students who meet these requirements principals will provide a recommendation to the BGSD dual credit lead teacher.

Application to the Dual Credit Program: For students who have been recommended, the BGSD dual credit lead teacher will email the **BGSD Dual Credit Application Form** to them; this must be completed online. Applications must be submitted prior to the deadlines below. **Available spots will be filled on a first-come first-served basis**. Late applications *may* only be accepted if space is available. *Incomplete forms will not be accepted.*

Application are open NOW - Deadlines:

Semester 1: June 28, 2024

Semester 2: November 10, 2024

Confirmation: Once your application is approved, you and your parent/guardian will **receive an email with instructions** to confirm your registration. This includes **completing the specific application** required by the Post-Secondary School delivering the course.

***Important note:** The post-secondary institution creates student accounts and communicates using **student emails**. Students are encouraged to use their BGSD gshare accounts on the application forms and to check these accounts frequently for messages from the post-secondary institution and the BGSD dual credit lead teacher.*

Applied Ecology

Course Description	Applied Ecology (EVS1210) - Students will be provided an introduction to ecological principles at the species, population, community and ecosystem levels. Specific application of ecology to sustainability and the management of forest and grassland ecosystems are studied.
Credits	High School Credits: 5 Post Secondary Credits: 3
Prerequisites	None
Schedule	March 2025 - May 2025
Post Secondary Information	 Olds College
Program Information	The Applied Ecology course is part of the following Olds College Pathways: <ul style="list-style-type: none"> • Land & Water Resources Diploma
Transferability	This course is considered low transferability. A Transfer Alberta search (http://transferalberta.alberta.ca) does not show any current transfer agreements for this course. *Course/credit transfer acceptance is always determined by the receiving institute and this information is in no way a guarantee of transferability.*
Course Assessments	A combination of Assignments, Quizzes and a Final Exam.
Post Secondary Program Prerequisites	Students interested in pursuing the entire program after high school should confirm program prerequisites directly on the college websites: <ul style="list-style-type: none"> • Land & Water Resources Diploma
Textbook and Material Cost	No additional costs

[Back to Index](#) [Back to Course Schedule](#)

Ecology

Course Description	Ecology (BIO1172) - Students study the interrelationships between living organisms and their environment with an emphasis on elements of the physical world which shape and define ecosystems.
Credits	High School Credits: 5 Post Secondary Credits: 3
Prerequisites	None
Schedule	September 2024 - December 2024 / January 2025 - May 2024
Post Secondary Information	 Lethbridge College
Program Information	The Ecology course is part of the following Lethbridge College Pathways: <ul style="list-style-type: none"> • Natural Resource Compliance Program • Renewable Resource Management Program • Environmental Assessment and Restoration Program
Transferability	A Transfer Alberta search (http://transferalberta.alberta.ca) shows that in the 2024/2025 school year the course transferred to Concordia University of Edmonton, Medicine Hat College and the University of Lethbridge *Course/credit transfer acceptance is always determined by the receiving institute and this information is in no way a guarantee of transferability.*
Course Assessments	A combination of Research Reports, Quizzes, Lab Assignments, Exams and Homework.
Post Secondary Program Prerequisites	Students interested in pursuing the entire program after high school should confirm program prerequisites directly on the college websites: <ul style="list-style-type: none"> • Land & Water Resources Diploma
Textbook and Material Cost	Approximately \$200 for Textbook

[Back to Index](#) [Back to Course Schedule](#)

Basic Energy Principles

Course Description	Basic Energy Principles (RC 200) - Provides understanding of principles of energy systems including electricity, heat, energy movement and water flow. Examines principles related to energy storage and transfer. Provides basic math review and practice with basic types of calculations used in the energy industry.
Credits	High School Credits: 5 Post Secondary Credits: 3
Prerequisites	None
Schedule	September 2024 - December 2024 / February 2025 - May 2025
Post Secondary Information	 Lakeland College
Program Information	The Basic Energy Principles course is part of the following Lakeland College Pathways: <ul style="list-style-type: none"> • Sustainable Energy Technology (Certificate/Diploma)
Transferability	A Transfer Alberta search (http://transferalberta.alberta.ca) shows that in the 2024/2025 school year the course transferred to Athabasca University and MacEwan University *Course/credit transfer acceptance is always determined by the receiving institute and this information is in no way a guarantee of transferability.*
Course Assessments	A combination of Assignments, Discussions, Midterm and Final Exam
Post Secondary Program Prerequisites	Students interested in pursuing the entire program after high school should confirm program prerequisites directly on the college websites: <ul style="list-style-type: none"> • Sustainable Energy Technology (Certificate/Diploma) - Lakeland College
Textbook and Material Cost	No Additional Costs

[Back to Index](#) [Back to Course Schedule](#)

GIS and Remote Sensing

Course Description	GIS and Remote Sensing (SC 200) - An introduction to map reading, coordinate systems, Geographic Information Systems (GIS), and remote sensing. Students learn map projection measurement, and scale calculations. Global Positioning System (GPS) instruments are introduced. There is a focus on the fundamentals of GIS, including coordinate systems and map projections, data models, spatial analysis, and environmental applications of GIS. The final portion of the course focuses on the principles of remote sensing, working with manned-aerial, Unmanned Aerial Vehicle (UAV), and satellite imagery, and introduces various applications of remote sensing in the environmental sciences. Promotional Video: https://bit.ly/3xut78z
Credits	High School Credits: 5 Post Secondary Credits: 3
Prerequisites	None
Schedule	September 2024 - December 2024 / February 2025 - May 2025
Post Secondary Information	 Lakeland College
Program Information	<p>The GIS and Remote Sensing course is part of the following Lakeland College Pathways:</p> <ul style="list-style-type: none"> • Bachelor of Agricultural Technology • Environmental Sciences
Transferability	<p>A Transfer Alberta search (http://transferalberta.alberta.ca) shows that in the 2024/2025 school year the course transferred to Athabasca University, Concordia University of Edmonton, Lethbridge College and MacEwan University.</p> <p>*Course/credit transfer acceptance is always determined by the receiving institute and this information is in no way a guarantee of transferability.*</p>

Solving Technology Problems

Course Description	Solving Technology Problems (ATG1008) - Students will engage in the problem-solving process using current hardware and software tools for applied data-driven problem solving. Through data analysis, algorithmic problem solving, and technical memo writing students will work to solve a technical agricultural issue. Programming/Coding and Microsoft Excel spreadsheets (graphing/figures/charts) will be key skills learned and put into action making a Zumo robot perform a set task. Prior coding skills are not required but students should be comfortable with math (algebra and polynomials at minimum grade ten level) and working hard in the trial and error process involved with learning to code.
Credits	High School Credits: 5 Post Secondary Credits: 3
Prerequisites	None
Schedule	September 2024 - December 2024
Post Secondary Information	 Olds College
Program Information	The Solving Technology Problems course is part of the following Olds College Pathways: <ul style="list-style-type: none"> • Precision Agriculture Techgromony Diploma
Transferability	This course is considered low transferability. A Transfer Alberta search (http://transferalberta.alberta.ca) does not show any current transfer agreements for this course. *Course/credit transfer acceptance is always determined by the receiving institute and this information is in no way a guarantee of transferability.*
Course Assessments	A combination of Quizzes, Assignments, Projects and a Final Exam
Post Secondary Program Prerequisites	Students interested in pursuing the entire program after high school should confirm program prerequisites directly on the college websites: <ul style="list-style-type: none"> • Precision Agriculture Techgromony Diploma
Textbook and Material Cost	Approximately \$140 for Zumo Arduino Robot, batteries and USB cables. A computer running Windows 10 or higher is required.

[Back to Index](#) [Back to Course Schedule](#)

Electronics & Control Systems in Precision Agriculture

Course Description	Electronics & Control systems in Precision Agriculture (ATG1007) - Students will investigate foundations of control systems, electronics and practical applications in precision farming. Through experiential learning, students will identify and troubleshoot components within hardware and devices, demonstrate uses/applications of geospatial technology, test control systems and their role in product application, evaluate hardware and software, program farm equipment, and demonstrate a proven process for identifying/troubleshooting components in Agricultural Technology equipment and interpret digital diagnostic data.
Credits	High School Credits: 5 Post Secondary Credits: 3
Prerequisites	None
Schedule	March 2025 - May 2025
Post Secondary Information	 OLDS COLLEGE Olds College
Program Information	<p>The Solving Technology Problems course is part of the following Olds College Pathways:</p> <ul style="list-style-type: none"> • Precision Agriculture Techgromony Diploma
Transferability	<p>This course is considered low transferability. Course Assessments	A combination of Tests and Projects.
Post Secondary Program Prerequisites	<p>Students interested in pursuing the entire program after high school should confirm program prerequisites directly on the college websites:</p> <ul style="list-style-type: none"> • Precision Agriculture Techgromony Diploma
Textbook and Material Cost	Approximately \$70 in materials. Students require a PC running Windows 10 (not a Mac or Chromebook)

[Back to Index](#) [Back to Course Schedule](#)

Agricultural Finance

Course Description	Agricultural Finance (AGS1150) - An introduction to finance concepts and their application in an agricultural context. Topics include the interpretation of financial information, terminology, investment analysis, sensitivity analysis and asset valuation. Conceptual learning will be applied with practical computer lab exercises.
Credits	High School Credits: 5 Post Secondary Credits: 3
Prerequisites	None
Schedule	January 2025 - May 2025
Post Secondary Information	 Lethbridge College
Program Information	The Agricultural Finance course is part of the following Lethbridge College Pathways: <ul style="list-style-type: none"> • Agricultural Sciences
Transferability	A Transfer Alberta search (http://transferalberta.alberta.ca) shows that in the 2024/2025 school year the course transferred to the University of Lethbridge. *Course/credit transfer acceptance is always determined by the receiving institute and this information is in no way a guarantee of transferability.*
Course Assessments	A combination of Lab Assignments and Exams
Post Secondary Program Prerequisites	Students interested in pursuing the entire program after high school should confirm program prerequisites directly on the college websites: <ul style="list-style-type: none"> • Agricultural Sciences
Textbook and Material Cost	No Additional Costs

[Back to Index](#) [Back to Course Schedule](#)

Commodity Marketing

Course Description	Commodity Marketing (MKT1152) - An overview of the alternatives available in the marketing of agricultural commodities. Topics include the role of futures markets, the mechanics of futures trading, the use of futures market to hedge, and the interpretation of market information.
Credits	High School Credits: 5 Post Secondary Credits: 3
Prerequisites	Grade 11/12 Students only
Schedule	September 2024 - December 2024
Post Secondary Information	 Lethbridge College
Program Information	<p>The Commodity Marketing course is part of the following Lethbridge College Pathways:</p> <ul style="list-style-type: none"> • Agricultural Sciences
Transferability	<p>A Transfer Alberta search (http://transferalberta.alberta.ca) shows that in the 2024/2025 school year the course transferred to Mount Royal University and the University of Lethbridge.</p> <p>*Course/credit transfer acceptance is always determined by the receiving institute and this information is in no way a guarantee of transferability.*</p>
Course Assessments	A combination of Problem Sets, Exams and Online Activities
Post Secondary Program Prerequisites	<p>Students interested in pursuing the entire program after high school should confirm program prerequisites directly on the college websites:</p> <ul style="list-style-type: none"> • Agricultural Sciences
Textbook and Material Cost	No Additional Costs

[Back to Index](#) [Back to Course Schedule](#)

Introduction to the Veterinary Profession

Course Description	Intro to Veterinary Profession (AHT1050) - Students will become familiar with selected animal health organizations and will adhere to the regulations of veterinary medicine in Alberta. Students are introduced to strategies and techniques for managing self and interacting with others. Students will apply critical thinking skills to animal welfare situations. This course provides students with foundational veterinary medical terminology they will use throughout their career.
Credits	High School Credits: 5 Post Secondary Credits: 3
Prerequisites	None
Schedule	September 2024 - December 2024 / March 2025 - May 2025
Post Secondary Information	 Olds College
Program Information	<p>The Intro to Veterinary Profession course is part of the following Olds College Pathways:</p> <ul style="list-style-type: none"> • Animal Health Technology Diploma • Veterinary Technical Assistant Certificate • Veterinary Medical Receptionist Certificate

Macroeconomics

Course Description	Macroeconomics (ECON1110) - The overall health of the economy as measured by gross domestic product, unemployment rates, inflation rates, interest rates, the balance of payments, exchange rates and the money supply are the prime focus of this course. Keynesian and monetarist theories of income and employment are used as a framework for analyzing government monetary and fiscal policies. The role of the Bank of Canada and the chartered banks in determining the money supply and interest rates is reviewed. Current debate relating to the public debt and supply side economics is evaluated. International economic issues including free trade and the balance of payments are also examined. Where appropriate, applications to current events are introduced and topics are enhanced wherever possible.
Credits	High School Credits: 5 Post Secondary Credits: 3
Prerequisites	English 20-2 and a minimum of Math 10-c or Math 10-3

Early Learning and Childcare Certificate Program

Program Description	<p>Would you like to be a positive influence in the lives of young people? Consider a career in early learning and child care. The Early Learning and Child Care Certificate Program will give you the training you need to work in this rewarding career. You will be trained to work with children from birth to 12 years of age in settings such as daycares, preschools, after-school programs, and private day homes. Graduates will also develop the skills to work effectively with children with exceptionalities. The cost to take courses in this program through your high school is free (other than the cost of books). To take this full program after high school, tuition and material costs would be approximately \$2600.</p>
Credits	<p>High School Credits: 5/course Post Secondary Credits: 3/course</p>
Prerequisites	<p>60% in ELA 10-1 or 70% in ELA 10-2 is required to start taking a course in this program.</p> <p>To complete the full program students will require English 30-1 (60%) or 30-2 (70%) to take COMM1000 and ENGL1000.</p>
Schedule And Course Descriptions	<p>Students may take one or more courses from the program - as their schedule permits. They do not need to commit to completing the entire program. These are the first courses we are offering from this program. For a list of all the courses in the program click here</p> <p> Child and Adolescent Development (CDEV0101) - FALL (Sept. - Dec.) This course introduces students to the concept of life cycle and examines the principles, theories, and research findings that contribute to the understanding of normative development and learning in children from birth to early adolescence. Students will study the development of the whole child including social, physical, cognitive, creative and emotional development. Students in this course will also have an opportunity to study child development from a multicultural perspective COST: Textbooks must be purchased by the student \$60-\$150 new but used may be available. eText may also be a less expensive option.</p> <p> Intro to Early Learning and Child Care (ELCC0100) - FALL (Sept. - Dec.) In this course students will learn what is required to work professionally and effectively in Early Learning and Child Care environments. Students become knowledgeable in the history of Early Childhood Education programs, professional ethics, codes of conduct, job descriptions and role clarifications. Students will learn their role in public policy advocacy, provincial certification requirements and quality standards in Early Childhood Programs. Socio-cultural diversity with a unique Aboriginal perspective is explored in these areas. In addition, policies on early childhood from the National Association for the Education of Young Children (NAEYC) and Alberta Child and Youth Services are covered. COST: Textbooks must be purchased by the student ~\$70 - \$140 new but used may be available. eText may also be a less expensive option.</p> <p> Infant and Toddler Care (ELCC0104) - Winter (Jan. - Apr.) Children thrive in environments that consider the well being of the whole child. This course focuses on developmentally and culturally appropriate programming that is appropriate for infants and toddlers in private and group childcare environments. COST: Textbooks must be purchased by the student - cost to be announced in fall</p> <p> Learning Through Play (ELCC0103) - Winter (Jan. - Apr.) Play is essential to development because it contributes to the cognitive, physical, social, and emotional well-being of children. This course discusses the importance of play for young children, and prepares students with the skills to develop developmentally appropriate play programs for children ages birth to twelve years. It also focuses on the importance of reinforcing creativity in young children. COST: Textbooks must be purchased by the student - cost to be announced in fall</p>

Education Assistant Program

Program Description	<p>The Educational Assistant Program at Northern Lakes College will give you the training you need for a meaningful career working with children in school settings. Responsibilities include helping students with exceptionalities by adapting their educational materials and programs. Educational Assistants also observe and report student progress to teachers and other related professionals. As well, they help students learn in one-on-one or small group situations, promote inclusion, and prepare instructional materials for teachers. The cost to take courses in this program through your high school is free (other than the textbooks). To take this full program after high school, tuition and material costs would be approximately \$5900.</p>
Credits	<p>High School Credits: 5/course Post Secondary Credits: 3/course</p>
Prerequisites	<p>60% in ELA 10-1 or 70% in ELA 10-2 is required to start taking a course in this program.</p> <p>To complete the full program students will require English 30-1 (60%) or 30-2 (70%) to take COMM1000 and ENGL1000.</p>
Schedule And Course Descriptions	<p>Students may take one or more courses from the program - as their schedule permits. They do not need to commit to completing the entire program. These are the first courses we are offering from this program. For a list of all the courses in the program click here</p> <p> Introduction to Exceptionalities (EDAS0108) - FALL (Sept. - Dec.) Inclusion has led to the full integration of children with exceptionalities into many schools. This, in turn, has created a greater need for individuals with special training. This course examines the philosophy and educational concepts associated with inclusion. Students will have the opportunity to develop in-depth knowledge of strategies and interventions in the field of special education, and examine the use and application of Assistive Technology. The course will also focus on the effects of medications on behavior and learning, as well as the recognition and appropriate responses to many common health issues within inclusive classrooms and early learning environments. COST: Textbooks must be purchased by the student ~ \$58 - \$88 new but used may be available online. eText may also be a less expensive option.</p> <p> Child and Adolescent Development (CDEV0101) - FALL (Sept. - Dec.) This course introduces students to the concept of life cycle and examines the principles, theories, and research findings that contribute to the understanding of normative development and learning in children from birth to early adolescence. Students will study the development of the whole child including social, physical, cognitive, creative and emotional development. Students in this course will also have an opportunity to study child development from a multicultural perspective. COST: Textbooks must be purchased by the student \$60-\$150 new but used may be available online. eText may also be a less expensive option.</p> <p> Effectively Managing Student Behaviour in Educational Settings (EDAS0102) - WINTER (Jan. - April) Children learn best when their self-esteem is healthy and the educational expectations are clear. This course will focus on developing an understanding of the classroom as a dynamic learning environment in which the teacher assistant is an essential part; a philosophy of discipline that forms a basis for dealing effectively with children experiencing behavioral difficulties; and strategies and practical approaches for classroom management. Methods of pupil supervision; proactive approaches to discipline with an emphasis on problem solving and effective interventions; strategies for dealing with inappropriate confrontational behavior in a productive life enhancing way; and observation and documentation of student actions in behavioral terms will also be included. Registration Deadline: Mid November COST: Textbooks must be purchased by the student - textbook costs to be announced in the fall.</p>

	 Practicum 1 & Seminar (EDAS0109) - WINTER (Jan. - April) The practicum experience provides the opportunity for students to meld theory with practice and refine their skills as educational assistants. Through facilitated group discussion and participation in 15 hours of seminar, students will also have the opportunity to link the classroom learning with field-related experiences and issues. Students with experience in the classroom may apply for advanced placement for this practicum. Registration Deadline: Mid November COST: no cost
